The Central region generated the lowest overall profit among all regions, significantly underperforming compared to the West and East regions. This suggests possible operational inefficiencies, weaker sales performance, or reduced profit margins that may require strategic business attention.

The scatter plot reveals a negative relationship between discount and profit, showing that higher discount rates generally resulted in lower profitability across product categories. Technology maintained the highest profit with relatively lower discount levels, while Furniture experienced higher discounts with lower profit performance.

Profit margins vary significantly across sub-categories, with Tables, Bookcases, and Supplies recording negative margins, indicating weak profitability. In contrast, Labels, Paper, and Envelopes achieved the strongest profit margins, showing better cost efficiency and pricing performance.
